

NEW VARIETIES OF DUTCH IRIS

SAME LOW PRICES AS LAST YEAR

SAME HIGH QUALITY AS ALWAYS

Dutch Iris in quantity for only 1 1/2c each. Orders for as few as 4 bags (144 bulbs) less than 2c each. Ranunculus and Anemones even cheaper. To give you the benefit of obtaining quantity price, when a mixture of items is ordered all stock will be priced "by the bag" and the price will be computed on the basis of the total number of bags ordered of all stock. This will enable you to get a quantity price on a single bag of Ranunculus, for example, when it is ordered with a quantity order of Dutch Iris.

RANUNCULUS

TRICKY TO GROW BUT WORTH THE EFFORT

A well-bred relative of the common Buttercup. Our Ranunculus will produce a number of large, full, double blooms of brilliant colors and delicate texture. Ranunculus requires more care and cultivation than Dutch Iris, but they have the great virtue of producing a comparatively large plant from a very small bulb and of producing a profusion of lovely blooms over a long period of time.

Packed 40 to the bag.

ANEMONES

A bloom similar in size and texture to Ranunculus, and care is also similar. The colors are slightly different from Ranunculus but blend well with them and for that reason the two are frequently planted together. We have both the double (St. Brigid) and the single (De Caen) Anemones, but it should be remembered that even the double Anemones will actually produce double flowers only if given proper care.

Packed 40 to the bag.

DUTCH IRIS

THE FOOLPROOF BULB—WILL GROW IN SPITE OF YOU

Without question Dutch Iris is the most reliable bulb that can be planted in the Fall. It will give you more beauty with less investment in time and money than any other Fall bulb. Our Dutch Iris are of unsurpassed beauty and guaranteed to bloom 100%. You just can't beat Dutch Iris for making a brilliant show for negligible cost, and effort.

Even if you have a planting of Dutch Iris from last year, we suggest that you add a few bags of fresh bulbs to maintain the quality of your planting. All of our bulbs have been grown in Holland, spaced in the field, under the finest possible conditions and will produce blooms superior to those which have been left in the ground and which have become one-sided due to crowding.

Dutch Iris are most effective if planted in mass and our low prices make this possible. One very effective way of planting Iris is in clumps of 12 or more in a single color to the clump, with the bulbs planted not further than 1" apart. If they are planted in a bed, we recommend spacing about 4" apart each way. At this spacing a bag of 36 bulbs will plant 4 square feet of bed space. For a border planting, we recommend a triple row of bulbs about 2" apart each way. At this spacing, a bag of 36 bulbs will plant 2 feet of row. Since Dutch Iris produces little foliage and stems from 12" to 18" above the ground, they can be planted in with low growing bedding plants such as Pansies.

Packed 36 to the bag.

NOTE THE NEW VARIETIES OF DUTCH IRIS

ORDER BLANK
